

I beleive that XM Radio should be able to and bring more local traffic, airport, and weather to the listeners. By taking the right for them to broadcast this, it would take away from their freedom, and the freedom of the listeners. If local radio stations think that XM is taking away from their listeners, then maybe they should do a better job and become more like XM Radio. I am a long time subscriber and I want XM Radio to be able to broadcast what I want, without the FCC, Congress, and all of these local radio station telling myself and XM what I can listen to and where I have to get my traffic and weather information from. Stop trying to run XM Radio into the ground and let the listeners decide what we want to listen to and where we get want to listen to it. I pay for exclusive radio, and I expect to continue to get it, LEAVE XM Radio, AND "Satellite Radio" IN GENERAL, ALONE.

Respectfully,

TS
